

## **REQUEST FOR PROPOSAL**

Laboratory Information Management System

### **ADDENDUM B** Additional Question and Answer

**September 22, 2010**

## 1. PURPOSE

The purpose of this addendum is to include additional information that would prove beneficial to assist candidates in preparing their proposals. This addendum offers an answer to an additional question that was raised from Addendum A.

## 2. ACKNOWLEDGEMENT OF RECEIPT OF SUPPLEMENTAL INFORMATION

Please acknowledge receipt of this Supplemental Information to RFP No. 2010-005-240 by including this acknowledgement on the cover of the sealed container. See example below:

RFP No. 2010-005-240  
Proposal Due Date and Time: Wednesday, September 29, 2010, 3:00 p.m. EST  
Record Drawing Production and GIS Data Capture  
Acknowledge Receipt of Addendum B

## 3. RESPONSES TO QUESTION

The Appendix A document "LIMS RFP Appendix A.docx" states the following, on page 1:

The Offeror will include supporting documentation including a data diagram and data dictionary showing the LIMS product's actual tables and relationship supporting this functionality.

The Offeror will include supporting documentation describing how security is managed by the system with specific details regarding security groups and granularity for applying rights to different data.

Q. Where do we include this documentation and data diagram(s)? This is far too big an amount of data to fit in the Matrix. Should we include it as an Appendix section to the proposal?

A. Please include the data diagram, data dictionary, and security documentation at the end of your Appendix A matrix responses. These pages will not count towards the 36 page limit. The Offeror is encouraged to summarize this information to describe key tables, relationships, data dictionary elements, and security features, rather than providing full, comprehensive database and security documentation.
