

Project: Broad Run Farms Waterline Extension (Loudoun Water Project WTR.00138)

Background: Loudoun County has been working with the Virginia Department of Environmental Quality (DEQ), the Environmental Protection Agency (EPA), and the Broad Run Farms community for several years to resolve the contamination issues at the Hidden Lane Landfill Superfund site. The EPA has an ongoing project to extend the Central Water System to the impacted lots (shaded in yellow).

In 2019, the Loudoun County Board of Supervisors approved a project to extend public water service to the remaining area in the Broad Run Farms community that the EPA Superfund Project does not cover. Upon completion of the construction, property owners will be able to apply for a connection to Loudoun Water's central water system. Connection to the system is optional.

Project Schedule: Loudoun Water has completed the design and is currently taking steps to advance the project to construction. Construction is expected to begin around October 2026 and will take about two years to complete. Letters will be mailed, and a public meeting will be held to provide project information and a construction status update to the area residents before the construction begins.

Please contact Amulya Poudel, Loudoun Water project manager, at (571) 291-7953 or apoudel@loudounwater.org if you have additional questions or concerns about this project.
