

Brambleton Water Storage Tank 2 Rehabilitation

July 2026

Project Fact and Information Sheet

Purpose: This project is required to ensure ongoing operational longevity and preserve the aesthetic appearance of the Brambleton Water Storage Tank 2 located in Ashburn, VA.

Project Description: This project includes interior and exterior re-coating of the existing 2,500,000-gallon fluted column elevated water storage tank and other miscellaneous improvements. The project also requires temporary removal of telecommunications equipment and a temporary monopole antenna tower at the site for the duration of construction which will ensure no cell service disruption due to the project.

Construction Information:

1. The Project Site is located in Ashburn, VA.
2. Increased vehicle traffic is anticipated accessing the site.
3. Construction access will be from Parkland Farms Terrace via Moonbeam Terrace.
4. Contractor normal work hours are from 7AM to 5PM Monday – Friday.

Construction Schedule: *

Commence Construction – August 2026
Substantial Completion – July 2027
Final Completion – August 2027

Contractor: TBD

Construction Cost: TBD
