Water and Reclaimed Water

| Type of Pipe | Diameter of Pipe | Minimum Horizontal Separation |  |  | Minimum Soil | Minimum Vertical Separation |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | to Sanitary Sewer Main, Manhole, or Other Sewer Structure | to Building or Other Above Ground Structure | to Storm Drain or Other Underground Utility |  | to Sanitary Sewer | to Other Utillity** |
| Main | 12-inch and Larger | 10 feet | 15 feet* | 6 feet | 3.5 feet | 1.5 feet | 1.5 feet |
| Main | 6 -inch to 10-inch | 10 feet | 15 feet* | 6 feet | 3 feet | 1.5 feet | 1.5 feet |
| Service | all sizes | 6 feet from a sanitary lateral | 5 feet from building, structure, or driveway | 5 feet | 3 feet | 1.5 feet | 1.5 feet |
| All clearances are as measured outside to outside. |  |  |  |  |  |  |  |
| * For water mains 12 -inch and smaller with no more than 5 feet of cover, separation may be reduced to as little as 10 feet with case specific approval from Loudoun Water. <br> ** Where water is above other utility, clearance may be reduced to as little as 0.5 foot, with case specific approval from Loudoun Water. Minimum soil cover on water can be no less than 2 feet. Additional clearance and/or casing may be required where water passes below a large drain or duct. Reduced separation is not permitted where water preexists and other utility is being installed subsequently. |  |  |  |  |  |  |  |

Sanitary Sewer

| Type of Pipe | Diameter of Pipe | Minimum Horizontal Separation |  |  |  |  | Minimum Vertical Separation |  | Minimum Soil Cover | Maximum Cover |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | to Water Main | to Building or Other Above Ground Structure | to Storm Drain or Other Underground Utility | to Non-Potable Well | to Potable Well* | Sewer is Below Utililty | Sewer is Above Utillity |  |  |
| Trunk Main or Interceptor | 16-inch and larger | 10 feet | 15 feet | 6 feet | 25 feet | 50 feet | 2 feet | 1.5 feet | 6 feet ** | 20 feet *** |
| Local Collection Main | 8 -inch to 12 -inch | 10 feet | 15 feet | 6 feet | 25 feet | 50 feet | 2 feet | 1.5 feet | 6 feet ** | 20 feet *** |
| Lateral or Bulding Sewer | 4-inch and larger | 6 feet from a water service | 6 feet | 6 feet | 25 feet | 50 feet | 2 feet | 1.5 feet | 2 feet | -- |
| Manhole | All | 10 ft | 15 feet | 6 feet | 25 feet | 50 feet |  |  |  |  |

All clearances are as measured outside to outside.
Minimum separation between sewer service connections along the main is 5 feet.
May be reduced to as little as 35 feet if sewer is pressure pipe, tested in place. This separation is regulated by the Code of Viriginia and Loudoun County Ordinance.
** May be reduced to as little as 3 feet in isolated instances, with case specific approval from Loudoun Water. See Chapter 5 for parameters. At least 4 vertical feet are needed to accomodate a manhole.
*** Deeper sewers are discouraged, but are occasionally necessary, based on available routes and topography. Successful designs will be those that follow the natural topography. See Chapter 5 for design parameters. Consult Loudoun Water staff where considering a design requiring sewer deeper than 20 vertical feet.
